Mobile: +91-7357316266

Skills

- **Languages**: C++, Python, Java, JavaScript, C
- **Web Development:** HTML, CSS, React, Tailwind CSS, Node.js, Express.js
- **Databases:** MySQL, MongoDB
- **AI / ML:** Scikit-learn, TensorFlow, OpenCV, Natural Language Processing (NLP), Hugging Face Transformers, Pandas, NumPy, Matplotlib, Seaborn
- **Tools / Technologies:** Git, GitHub, Docker, Flask, FastAPI
- **Soft Skills**: Communication, Leadership, Time Management, Problem-Solving, Team Player, Adaptability, Decision Making

Training

AI Powered NLP | AlgoTutor Academy *Jul' 25 – Aug' 25*

- Completed hands-on training focused on building practical Natural Language Processing (NLP) solutions using AI-based techniques.
- Worked on text preprocessing, sentiment analysis, Named entity extraction, text classification, and chatbot development.
- Understood how modern transformer models (like BERT and GPT) power real-world NLP applications.
- Implemented mini-projects involving data cleaning, model training, evaluation, and deployment workflow basics.

Tech stacks used: Python, NLTK, spaCy, scikit-learn, TensorFlow/PyTorch basics, Hugging Face Transformers.

Projects

- **HMM-Based POS Tagging for Code-Mixed Text | NLP Project** *Dec' 25*
  - Developed a Part-of-Speech (POS) tagging system for code-mixed Hindi-English (Hinglish) text using Hidden Markov Models (HMM).
  - Implemented preprocessing, tokenization, and probabilistic tagging to handle real-world multilingual text data effectively.
  - Built and deployed an interactive web application for testing and visualizing POS tagging results in real time.

  Tech Stack: Python,, NLP, Hidden Markov Models (HMM), HTML, CSS, JavaScript, Flask | Deployment: Render

- **Dynamic Memory Visualizer | Memory Management Tool** *Oct' 25*
  - Built a web-based simulator that visualizes OS memory management techniques like paging, segmentation, and virtual memory.
  - Integrated interactive visual components to improve conceptual understanding of allocation and replacement algorithms.
  - Enabled users to experiment with different memory strategies through a responsive interface.

  Tech Stack: Python, Flask, HTML, CSS, JavaScript | Deployment: Render

- **LumiTrax | Productivity & Tracking Web App** *Sep' 25*
  - Developed a responsive web application to track tasks, productivity metrics, and daily progress efficiently.
  - Designed an intuitive user interface with modern frontend technologies to enhance user engagement and usability.
  - Implemented features for organizing activities, monitoring performance, and improving time management.

  Tech Stack: HTML, JavaScript, React, Tailwindcss, Firebase | Deployment: GitHub Pages

- **StudyVerse | Learning Platform Web App** *Apr' 25*
  - Created a web-based learning platform to organize study materials, notes, and resources in a structured manner.
  - Focused on clean UI/UX design to provide students with an efficient and distraction-free study environment.
  - Ensured responsiveness and accessibility across devices for improved user experience.

  Tech Stack: HTML, CSS, JavaScript, LocalStorage | Deployment: GitHub Pages

Certificates

- Introduction To Internet Of Thing | NPTEL course *Jan' 25 – Apr' 25*
- Programming in C, C++, Java and DSA | NeoColab *Jan' 24 – Aug' 25*
- Responsive Web Design | FreeCodeCamp *Aug' 23 – Oct' 23*

Achievements

- Solved 200+ coding problems on coding platforms | Codolio. *Nov' 25 - Present*
- Secured a contest rating of **1487**, ranking among the top ~48% globally on leetcode. *Mar' 26*
- Consistently maintained **~8.5+ CGPA**, with 9.08 TGPA in a semester. *Aug' 23 - Present*

Education

- **Lovely Professional University** Phagwara, Punjab
  Bachelor of Technology - Computer Science and Engineering; ***CGPA: 8.55*** *Aug' 23 - Present*
- **Army Public School** Jalandhar, Punjab
  Intermediate; ***Percentage: 90.4*** *Apr' 21 – Mar' 22*
- **Army Public School** Bikaner, Rajasthan
  Matriculation; ***Percentage: 91.2*** *Apr' 19 – Mar' 20*
